## ARCHITECTS' NOTES

E. Allen Wilson, architect, 815 Land Title Building, has plans on board for a five-story brick factory building to be built at the northeast corner of Third and Spruce streets, to cost about \$50,000 for Bayuk Bros.

Mr. Howard B. French, president of the Equitable Trust Company, of this city, has concluded to rebuild his summer residence near the King of Prussia, Montgomery county, Pa., which was recently destroyed by fire. Mr. French proposes to have plans made with this end in view.

The fire which destroyed Mr. French's beautiful summer home is supposed to have been caused by sparrows having picked up a match or two and used them for nest building. The fire originated under the eaves, far away from the chimneys, and the sparrow theory is the only logical one.

Newman & Harris, architects, 1414 S. Penn Square, have distributed plans for a two and a half story stone residence, measuring 56 1/2 x 69.10 feet, to be built in Ithan, Pa., for Helen Erben, to cost about \$25,000. Metzger & Wells, Thomas M. Seeds, Jr., R. C. Ballinger & Co., Milton W. Young, F. L. Hoover & Sons, Inc., of Philadelphia; F. H. Mahan, Ardmore, and Gray Bros., of Rosemont, Pa., are bidding.

Bunting & Shingley, architects, 603 Chestnut street, have sent out plans for the two-story stone and shingle addition, measuring 32 1/2 x 17.2 feet, to be built to the residence of Frank H. Fleer, on Lansdowne avenue; also for an extension to the garage at the same place. The following builders are bidding: Bowers & Logan, George L. Stups, Thomas C. Trafford, of this city, and G. C. Herbert and C. Moore, of Lansdowne, Pa.

The projected opening of the Baeder tract, near Jenkintown, Pa., is one of the largest realty propositions that has been transacted in years. The tract is owned by John Wanamaker and comprises 250 acres, fronting on the Old York and Fitzwaterdown roads, adjoining the northern line of Jenkintown, in Abington township. It is stated that about \$150,000 will be expended in macadamizing roads and in the laying out of that section. William H. Fretz, postmaster of Jenkintown, has purchased six acres of land west of Leedom street, near the Baeder tract, for \$1,325 an acre. The land was part of the estate of the late Joseph H. Shoemaker.

Simon and Bassett, architects, 1112 Chestnut street, are receiving estimates on alterations and improvements to the Hutchinson Banking Company at 1034 Sedgley avenue. They are also taking bids on the proposed alterations to be made to the plant of G. F. Pfund & Sons, butchers, 3945 Germantown avenue. The same architects have awarded the con-

tract for the stone and frame bungalow, 49 x 40 feet, to be built in Cresco, Monroe county, Pa., for Mrs. Eugenia Harlow, to C. E. Smith.

Haskell & Barnes, architects, Wilson Building, 301 North Charles street, Baltimore, Md., have prepared plans for a church to be erected for the Forest Park Methodist Episcopal congregation, of which Rev. F. M. Gillum is the pastor. It will be one story high, of stone, slate roof, steam heat, electric work, church furniture and fixtures, sanitary plumbing and modern conveniences. The seating capacity will be five hundred. The cost will be about \$25,000.

Harding & Upman, 729 Fifteenth street, Northwest, Washington, D. C., have prepared plans for a bank and office building for the Washington Mechanics' Saving Bank, of which Mr. Ezra Gould is president. The structure will be two stories high; base and steps of granite, and balustrade, pillars and trimmings of limestone. The other parts will be of gray brick, fine interior finish, marble and tile work, open plumbing, banking fixtures, plate glass and all modern conveniences. Bids will be received in a week or ten days.

Dr. Richard H. Harte, 1503 Spruce street, has received plans from architects Peabody and Stearns, of Boston, for his new residence to be built in Abington, Pa., on the Old York road. The plans provide for a handsome structure of stone with slate roof, two and a half stories high, measuring 114 x 52 1/2 feet with large porches surrounding. The interior will be fitted up with every modern appointment and convenience and contain parlor, living room, dining room, den, laundry coat room, kitchen, pantry and man's room on the first floor; six chambers; and four baths, five bedrooms and bath for servants, a linen room and dress closet on the second floor, and a billiard room chamber, bath and linen room in the attic. It will contain about 25 rooms. Plans are posted in the office of Frank E. Wallace, William R. Dougherty and J. S. Cornell & Sons, builders.

Frank Miles Day, architect, 925 Chestnut street, has been chosen by a ballot of the twelve New York architects, who are competing for the plans for the new municipal office building to be erected in New York City to be president of the Jury of Award, which will decide the competition. The structure will occupy a site at the end of Brooklyn Bridge, and must contain at least 600,000 square feet of office floors. Chambers street will pass under it at grade and the subway beneath it, and will have a station with entrances on what is ordinarily the first floor. Thirty elevators will also have entrances on same floor, and the engine and boiler rooms will occupy what or-

dinarily would be the second and third floors.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, have completed drawings and specifications and invited estimates, due April 23d, for an additional building and alterations to present building at 233 South Fifth street for Jonker D. Lit. The new building will be 28 x 112 feet, and have three stories and basement; the altered building is 28 x 32 feet, with four stories and basement. Both buildings will be of slow burning wood construction, with brick walls and slag roofs. The buildings will be provided with a tower fire escape, toilet accommodations and freight elevator. The following contractors have been invited to bid: Moore & Company, Herbert E. Havens, A. Raymond Raff, F. L. Hoover & Sons, Inc., William R. Dougherty and W. W. Rea's Son.

Carl P. Berger, architect, 1416-18 S. Penn Square, has finished plans and specifications for new church and school, building and parsonage for the Evangelischer Lutherische Tabor Kirche, to be erected on the southeast corner Mascher and Rockland streets to take the place of the old frame structure and lot on opposite corner about to be removed in the course of the N. E. Boulevard construction. The church is 40 x 93 feet, parsonage 20 x 60 feet, all of stone. Parish school and Sunday-school also provided for. Bidders invited to submit bids on Monday, April 27th, to A. M. are: Appleton & Burrell, Burd P. Evans & Co., Philip Haibach, H. B. Carroll, A. Raymond Raff, Thos. C. Trafford, Charles Yundt, Henry P. Schneider. To include modern plumbing low pressure steam heat for church and hot water heat for parsonage.

Frank E. Perkins, architect, 1133 Broadway, New York City, has won the competition for plans for the Capitol building, to be erected at San Juan, Porto Rico. The structure will be three hundred feet long, with a height of seventy-five feet. The materials to be used will be concrete or local brick, with a surface of tinted cement. The cost will be about \$300,000. Mr. Perkins' plans won the first prize of \$5,000. The second prize of \$2,000 was won by Architect Ritchie Abbott, of Boston, Mass., and the third prize of \$1,000 by Architect Henry L. Beal, 1123 Broadway, New York City. One hundred and thirty-five architects took part in the competition. Horace Trumbauer, architect, Land Title Building, this city, was awarded the first prize of \$2,000 for competition plans for the new Penitentiary, to be built at the same place. The plans provide for a group of five buildings of stone and stucco, measuring 300 x 600 cost about \$100,000. Mr. Wallace is making alterations and improvements to his own residence at 3309 N. Fifteenth street.

PHILADELPHIA, WED'Y, APR. 22, 1908

In spring time our thoughts naturally turn to house cleaning, both inside and out. House painting, and in fact, renovating generally, is a strong characteristic of the American, as it is in keeping with the American idea of home life as well as the caring for one's acquisition of real as well as personal property. Good paint is cheap, dirt cheap, when compared with the poor quality for its durability, for the cost of labor is the same.

The Real Estate Record knows a thing or two about what is known as pure white lead, for it unhesitatingly asserts from its own knowledge that pure white lead even with the best boiled linseed oil under the same conditions does not possess the durability, the whiteness, nor the prolonged freshness of Samuel H. French Co.'s Buck White Lead just because Buck White Lead is not pure. The paint that will rub or scale off is no better than just so much white wash; nor will it stand the weather or climate, and it is simply absurd to continue from year to year the use of a material which observing men know to be deficient in the service for which it is used just because of a sentimental fad. The paint that will stand the ravages of time and storm on vessels and houses around salt water is not only desirable, but it is the paint that everyone requires for use on woodwork. The cost of buck white lead is no greater than that of any other white lead, in small or large lots. It is not a profitable factor in the painter's trade, simply because of its durability, and this is the reason that it is not popular among painters generally; but owners should get wise and save money.

Horace Trumbauer, architect, Land Title Building, has been commissioned by Howard B. French, president of the Equitable Trust Company, of this city, to prepare plans for the erection of a country home in Montgomery county, Pa., near Radnor, which is in Delaware county, on the site of the one recently destroyed by fire. The house will contain about thirty rooms and will be the equivalent of three stories. It will be semi-Colonial with wide porches on three sides, heated by hot-air, finely finished on the interior and handsome gas fixtures. It will be built of plastic and brick. The gas plant was not injured by the fire.

## ARCHITECTS' NOTES

Ralph E. White, architect, 918 Pennsylvania Building, associated with G. K. Warren Rapp, of Lebanon, Pa., has been selected in competition to prepare the plans for the Sunday school building and an addition to the Seventh Street Lutheran Church, of Lebanon, Pa. The plans call for a brick structure to match the present building. The same architect has plans on boards for several handsome suburban residences. Bids will be invited shortly.

E. Allen Wilson, architect, 815 Land Title Building, has invited estimates on the three-story brick and stone flat house, measuring 85 x 30 feet, to be built at the southeast corner of Fifty-second and Locust streets, for James Blackburn. The plans call for a fine structure in the colonial style of architecture, with stores on the first floor and flats above, with porches for each flat, which is a new feature provided for by the architect in modern flat house construction. The interior will be finely finished in hardwood, tiled baths, sanitary plumbing, etc. The following builders are bidding: Lynch Bros, Henry E. Baton, A. Raymond Raff, Thomas Little & Son, Calvin W. Rogers and W. E. Dotts. Bids due May 28. The same architect has completed the plans for the following previously mentioned work: A pair of handsome ten-room residences for O. C. Bradin, to be built in Glenside, Pa. They will be three stories in height, 30 x 47½ feet, with porches. The first floor will be built of stone with shingle above and shingle roof. Also plans for 110 houses to be built at Walnut Lane Station, Germantown. They will be built in pairs, two stories in height, heated by hot air, sanitary plumbing, with all modern appointments. Also plans for the eight suburban residences to be built at Logan, Pa., for Messrs. Williamson & Messinger. They will be built in the colonial style of architecture, with stone on the first floor, with shingle above, and contain nine rooms with baths. They will be finished on the interior in hardwood and contain all modern appointments. The plans for the five-story slow burning brick factory, prepared by the same architect, for Bayuk Bros., to be built at the northeast corner of Third and Spruce streets, at a cost of about \$50,000, will shortly be ready for bids.

Oliver Randolph Parry, architect, 14 South Broad street, has completed sketches for a stone parish building, containing large room with stage, dressing rooms, etc., on ground floor, and kitchen, toilet rooms and gymnasium in basement; the entire building will be heated by steam and lighted by electricity. There will also be a cloister connecting the church and parish building. The same architect is preparing plans and specifications for

four reinforced concrete houses to be erected in Westmont, for Mr. W. P. Fowler, containing porch, living-room, dining-room, kitchen and laundry on first floor, and three bedrooms and bath-room on second floor. The attic will remain unfinished. He will also shortly have plans ready for alterations and additions to the Washington Hotel, at Williamstown, N. J., changing same into an automobile inn for Mr. William Mœbius. Previously mentioned.

Edgar V. Seeler, architect, Real Estate Trust Building, is preparing the plans for the new Curtis building, to be built on the north side of Walnut street, between Sixth and Seventh. The plans will not be ready for estimates for about four months. Previously mentioned in these columns.

Mrs. Annie Wertz Miller, of Devon, Pa., has bought the Rennyson property, consisting of 100 acres and a marble residence and eight tenement houses. Extensive alterations and improvements will be made and it will be occupied by the purchaser. The price said to have been paid is about \$30,000.

Dougherty, builder, 1610 Sansom street, this city, for estimates on a handsome stone residence, three stories in height, 123 x 120 feet, to be built at Chestnut and Fairmount avenues, Chestnut Hill, for H. A. Laughlin.

Baugh. It will be built in the Elizabethan style of architecture and contain 35 rooms. Wm. R. Dougherty, of this city, is estimating.

It was reported some time ago in these columns that the above architect had been commissioned to prepare the plans. The proposed building will be built of marble and granite, and measure about 200 x 80 feet.

Dr. Isaac Sharpless, president of Haverford College, announced Monday that a donation had been made the college by Mr. Alfred Perkins Smith to be used in the erection of a building for social and religious purposes. It will be similar in equipment to Houston Hall, of the University of Pennsylvania, and one of the features will be a finely finished auditorium with a seating capacity of two hundred and fifty. The site for the proposed new building is just north of Roberts Hall on the college grounds and work on its construction will begin the present season.

McCartney; seven two-story brick dwellings, to be built in Kensington, for J. J. Harriett, and a handsome three-story stone residence, to contain twelve rooms and baths, for John Philip Mayer, to be built in Logan, Pa.

Henry L. Reinhold, Jr., architect, N. E. corner Tenth and Sansom streets, is engaged on plans for two shelter stations to be built in Fairmount Park at the Wynnsfield Station

for the Fairmount Park Transportation Company. The plans will call for enclosed structures, one story in height, half timber and shingle, with tile roofs.

Milligan & Webber, architects, 520 Walnut street, have completed plans and specifications for a three-story brick dwelling to be built at Fitzwater and Randolph streets for Nicholas Cracco, who will take bids for its erection.

James M. Wilcox, vice-president of the Phila. Saving Fund Society, at Seventh and Walnut streets, has bought, through brokers Hirst & McMullin, the 40-acre tract of the Lewis estate at Radnor, Pa., on which to build a fine country residence for himself.

The estimated cost is about \$30,000.

A mission has just been started in Frankford that will result in the erection of an Italian Catholic church. At present services are being held in the Kearney Post Hall, on Unity street, under the direction of Rev.

Ernesto Santoro. The mission draws from hundreds of Italian families residing in the upper part of Port Richmond, Frankford, Bridesburg and Tacony. Among the residents taking an active part in the work are Michael Carunchio, Antonio Madonni and Joseph Dent. Within a year it is expected that the congregation will have grown to a sufficient size to warrant the erection of a building for its use.

Henry D. Dagit, architect, 411 Walnut street, has completed a new set of plans for the convent of the Immaculate Conception, at Broadway and Market streets, Camden, N. J. The plans call for a fine new structure, three stories in height, of stone. Phillips, associate architects, 430 Walnut street, Philadelphia, have been commissioned to prepare the drawings and specifications for a school building to be erected at Oreland, Pa., for the School District of Upper Dublin township, Montgomery county, Pa. In order to reduce the fire risk of the children to the minimum, it was decided to build a one-story building and thus eliminate the stairways, which have been found to be firetraps in many instances. The building will be designed in the Colonial style. Two rooms, with necessary wardrobes, corridors, etc., will be erected at present and arranged so that two more rooms may be added in the future. It will be built of Chestnut Hill stone and will have a black slate roof. A modern heating, ventilating and plumbing system will be installed. The following work is included: Cement cellar floor, Indiana limestone, dressed stone, maple flooring, slate black boards, North Carolina pine finish, etc. Drawings and specifications will be prepared at once and local contractors will be invited to estimate.

### ACCUMULATED EXPERIENCE.

Accumulated experience as expressed in the economics of a household conclusively establishes the fact that a small expenditure in the spring time with the proper kind of ready mixed paints freshens and brightens the wood work to the great satisfaction of the family; and indeed this holds good both to the owner of the house or an occupant of a rented one. The idea that painting is a matter of high art is a mistake, for most everyone has seen painting done by the tidy housewife which was equal in every particular to the skilled efforts of an experienced painter. The question is then, not how to do it, but what paint to use and where to buy. Samuel H. French & Company, Fourth and Callowhill streets, Philadelphia, have devoted over sixty years in an effort to produce a ready-mixed paint with a variety of colors and shades desirable for household purposes which are offered to the public with a conscientious regard as to value for durability as well as for beauty. Too often, however, mistakes are made in not understanding the importance of the necessity of a clean surface before placing the paint, and a little effort in this direction not only enhances the beauty of the painting when finished, but it also adds greatly to the value of the lasting qualities of the paint used. Samuel H. French & Company's manufacturing plant, as well as its offices, is located at Fourth and Callowhill streets, Philadelphia, with an auxiliary plant at Camden, N. J., for the manufacture of varnishes, and while the business is not confined to paint alone it practically embraces such a vast range of material as leads, enamels, varnishes, japans, fillers, mortar colors; also building cement and plaster and a fully equipped mantle, mosaic and tile department.

## ARCHITECTS' NOTES

The Tacony Presbyterian Church will engage an architect in a few weeks to prepare plans for a parsonage to be built at Tacony and Jackson streets, to cost about \$5,000.

George Bispham Page, architect, 1500 Market street, has plans on boards for general interior alterations to a residence in Jenkintown, Pa. The owner's name is withheld.

Charles L. Hofman, architect, 911 Walnut street, is engaged on sketches for a handsome residence to be built in Ocean City, N. J., the cost of which will be about \$8,000.

Horace Trumbauer, architect, Land Title Building, will invite estimates in about two weeks on the proposed alterations to the Union League club house. The plans call for general interior alterations and a rear addition to cost about \$100,000.

The Board of Education of Millville, N. J., has been notified by the County Superintendent, Glasspell, that the Culver School building is unsafe and unsanitary. It is probable that Council will be petitioned to erect a new building as soon as possible.

George T. Pearson, architect, 427 Walnut street, has invited estimates on a two and a half story brick and rough cast residence, 41.8 x 56 feet, containing 16 rooms and two baths, for Henry W. Brown, to be built on Oak road, Germantown. F. A. Havens & Co., builders, have plans posted. Bids due June 12th.

Newman & Harris, architects, have completed plans for a frame cow stable, to be built near Devon, Pa., for the G. W. Pepper Estate. The following builders are bidding: Frank E. Wallace, Thomas M. Seeds, Jr., Metzger & Wells, M. P. Murphy, of this city, and Gray Bros., J. D. Lengie and E. F. Yarnell, local builders.

Duhring, Okie & Ziegler, architects, Bailey Building, have distributed plans among builders for a three-story addition, 16 x 80 feet, to the Howard Hospital, at the corner of Broad and Catharine streets. The following builders are estimating: Calvin W. Rogers, Lynch Brothers, Smith-Hardican Company, R. C. Ballinger & Co., Burd P. Evans and Appleton & Burrell.

Architect Samuel Rogers, Saving Institute Building, Paterson, N. J., and Architect Charles Edwards, Market and Main streets, same place, have prepared plans for the administration building to be erected for the Paterson Orphan Asylum Association. The estimated cost is \$100,000. This does not include the wings which will be erected later at an additional cost of \$50,000.

Bruce, Price & De Silbour, 1135 Broadway, New York City, are preparing plans for the large new hotel to replace the present Arling-

ton Hotel, Vermont avenue and H street, Washington, D. C. The new structure will be handsomely finished and will be provided with every known modern convenience. The estimated cost including the site is about \$2,500,000. Mr. George Peabody Eustis is the owner.

E. Allen Wilson, architect, 815 Land Title Building, is engaged on plans for 4 houses to be built at Thirty-second and Berks streets. They will be three stories in height, in the Spanish style of architecture, and measure 16 x 38 feet. The same architect also has plans on boards for 27 two-story brick dwellings and 3 stores and dwellings to be built on Richmond street, Kensington, for Joseph B. Vanderslice.

Charles J. Brooke, architect, 14 South Broad street, has completed plans for a two and a half story stone and frame residence, 45 x 28 feet, to be built in Merchantville, N. J., for Frank N. Kellam. Local builders will be invited to bid. The same architect has given Builder C. H. Schuster a contract to build a two-story brick residence, 20 x 48 feet, on Mt. Ephraim avenue, for Charles McGarvey, and a residence for C. C. Geiges, to be built in Camden, N. J.

It is stated that an industrial home will be erected for the Scranton, Pa., Roman Catholic diocese. Bishop M. H. Hoban, of that diocese, is much interested in the project, and at his suggestion the Board of Directors of St. Patrick's Orphanage for Boys and Girls has appointed a committee to secure a site for such an institution. The plan is to buy a farm and to erect suitable buildings for both boys and girls. The buildings will be thoroughly fitted up for teaching trades to both sexes.

Ballinger & Perrott, architects and engineers, 1200 Chestnut street, are preparing plans and specifications for alterations and additions to the store at the S. W. corner of Carlisle and Race streets, for Mr. Joseph Schonders. The building is 18 by 73 feet, with three stories and basement. Bids will shortly be invited. The same architects are preparing drawings and specifications for a cottage to be erected on States avenue, near the Beach, Atlantic City, N. J., for Mr. Joseph Mathieu, of J. P. Mathieu & Company, this city. The building will be three stories in height, of frame construction, and cost about \$10,000.

Owens & Sisco, architects, Continental Building, Baltimore, Md., have finished plans for the new school building to be erected at Mount Washington, Md., at a cost of \$25,000. It will be fireproof in construction, reinforced concrete, electric lighting, steam heat, sanitary plumbing. The contract will be let

June 15th.—Plans have been prepared by Architect Francis E. Tormey, 404 Wilson Building, Baltimore, for an addition to St. Mary's Female Orphan Asylum, Cold Spring Lane, Roland Park. It will conform in design with the present building. J. J. Walsh & Son, 1525 Maryland avenue, and Edward Brady & Son, 1109-1113 Cathedral street, Baltimore, are estimating.

Oliver Randolph Parry, architect, 14 South Broad street, has awarded the contract to Linford Sperry for the erection of the new residence for George N. Whitaker to be erected in Glenside, Pa. It will be a handsome structure when completed and contain reception hall, dining room, kitchen and laundry on first floor, four bed rooms and bath room on the second floor and several rooms on the third floor. The same architect is receiving advance estimates on sketches showing an English half-timber residence containing living hall, reception room, dining room, kitchen, pantry on first floor, four bed chambers and bath room on second floor, servants' quarters on third floor. Pending receipt of the estimated cost the owner's name will be withheld, the location, however, being adjacent to Glenside.

Ballinger & Perrott, architects and engineers, 1200 Chestnut street, have completed drawings and specifications, and invited bids, due June 16th, for a modern printing building, for Edward Stern & Company, Inc., to be erected at the northeast corner of Seventeenth and Vine streets, extending to Pearl street. The building will be 117 x 126 feet, and have six stories and basement, with an additional story over a portion of the building for an electrolyte department. The columns, floors and roof will be of reinforced concrete fireproof construction, with slag roof covering. The walls will be of gray brick with granite base course and Indiana limestone and terra cotta trimmings. The main entrance will be on Vine street, and the first story will be raised several feet above the street level. The building will be provided with all modern sanitary toilet accommodations. There will be a concrete tank tower above the roof containing a 40,000 gallon sprinkler tank and a 5,000 gallon house supply tank. One passenger and two freight elevators and two fireproof tower stairways will provide means of communication between the several floors. Pennock, Sax & Abbott, Blackstaff Engineering Co., A. Raymond Raff, William R. Dougherty, all of this city, and James Stewart & Co., of Pittsburgh, Pa.

PHILADELPHIA, WEDNESDAY, JUNE 17, 1908

Less than One Year  
15 Cents per Copy**ARCHITECTS' NOTES**

C. E. Rahn, architect, 410 Walnut street, has invited estimates from builders for alterations and additions to the store and dwelling, at 4045 Lancaster avenue, for Mrs. M. J. Frizlen.

Watson & Huckel, architects, 1211 Walnut street, are engaged on plans for a new court house to be built in Bridgeton, N. J., for Cumberland county, and for alterations to the present building.

G. P. Page, architect, 1500 Market street, has invited estimates from Wm. R. Dougherty and Jacob Myers & Sons, builders, on the remodeling of the residence of Mrs. J. Howard Gibson, in Jenkintown, Pa.

Thomas, Churchman & Molitor, architects, North American Building, will shortly invite estimates from builders on the four-story addition, 38 x 100 feet, to be built to the Episcopal Academy, on Locust street, west of Thirteenth street, to cost about \$75,000.

Henry D. Dagit, architect, 411 Walnut street, has been engaged to prepare plans for the three-story granite parochial school, 67 x 150 feet, to be built at Eighth and York streets, for St. Edward the Confessor's Roman Catholic Church, to cost about \$75,000.

E. Allen Wilson, architect, 815 Land Title Building, is engaged on plans for 114 two-story brick dwellings to be built in West Philadelphia. Also plans for alterations to the property at the southeast corner of Twelfth and Catharine streets, for N. Ciparone.

Rowland W. Boyle, architect, 1626 Chestnut street, will shortly invite estimates from builders for the new church to be built in Morton, Pa., for Our Lady of Perpetual Help Roman Catholic congregation. It will be a stone structure with slate roof. Previously mentioned.

Hewitt, Stevens & Paist, architects, 671 Bullitt Building, have distributed plans for a two-story concrete fireproof laundry building for the Shute Laundry Company, to be built at Forty-ninth and Market streets. The following builders are bidding: J. E. & A. L. Pennock, Cramp & Co., Metzger & Wells and J. M. Kennedy.

The executors of the estate of Samuel R. Shipley, of this city, who owned the New Cliffs Hotel and cottages, at Newport, R. I., recently burned to the ground, have decided to build a \$200,000 hotel on the site. The decision of the executors of the Shipley estate assures Newport of one summer hotel for next season. No architect has been engaged yet.

J. M. Gummery & Sons, real estate brokers, northeast corner Broad and Walnut streets, negotiated a sale last week whereby the Philadelphia Turngemeinde takes title to the

property at the northeast corner of Broad and Columbia avenue. The building committee of the Turngemeinde has competitive plans from twelve architects for their proposed new building, to be built on the site.

A. A. Ritcher, architect, Lebanon, Pa., has prepared plans and is receiving bids for twenty attractive dwellings to be erected on "The Heights," at Lebanon. These dwellings will not be erected in a row, but each will have an individuality of its own. The supervision of the work is in the hands of Mr. Ritcher and work on the operation will begin as soon as possible. They will have finely finished interiors, exteriors of brick, and each will be provided with the usual modern conveniences.

Rankin, Kellogg & Crane, architects, 1012 Walnut street, have invited estimates from Henry E. Baton, H. E. Grau Co., R. M. Peterson, A. Raymond Raff and J. Sims Wilson on the three three-story brick officers' quarters for Marine Corps, to be built at League Island, at a cost of about \$30,000. Previously mentioned. The same architects are engaged on plans for a five-story brick and concrete addition to the United States Marine Corps quartermaster's storehouse, at Broad street and Washington avenue.

The Harrisburg Public Library Association has authorized a committee to proceed at once to select plans and to let the contract for the erection of a handsome library building on the site at Front and Walnut streets, Harrisburg, Pa. The association has a fund of \$40,000 for the erection of the building and the site first mentioned. Both the building fund and the site were bequeathed to the association some years ago by Mrs. Sara Haldeman Haly. The committee consists of Haldeman J. O'Connor, chairman; D. Bailey Brandt and James McCormick, Jr.

Wilson, Harris & Richards, Drexel Building, will in a few days invite estimates on the new infirmary building for the Mt. Alto Sanatorium for consumptives. The same architects have received bids from John R. Wiggins & Co., Appleton & Burrell, Thomas Reilly, F. A. Havens & Co., A. Raymond Raff, J. S. Cornell & Son, Roydhouse, Arey & Co., Stacy Reeves & Sons, W. R. Dougherty and the H. E. Grau Company for general interior changes to the warehouse of E. K. Janney & Co., southwest corner of Third and Wood streets.

Henry L. Reinhold, architect, northeast corner Tenth and Sansom streets, will shortly invite bids on revised plans for the proposed alterations and additions to the dwelling at the southwest corner of Fifteenth and Jefferson streets. When alterations are completed it will be used as an apartment house. The same architect has completed the plans for

two open shelter stations for the Fairmount Park Transportation Company, to be built at Fifty-second street park station and Wynnefield park station. They will be built of frame and metal, and measure 15 x 30 feet. The following builders are bidding: Edward Pay & Son, Thomas C. Trafrod, Pomeroy Construction Company and Calvin W. Rogers. Bids are due June 25th.

Carl P. Berger, architect, 1416-18 South Penn Square, has finished plans and specifications for a group of four buildings, each 42 x 61 feet, and each containing four suites of housekeeping flats, each of which contains private halls, living room, dining room, kitchen, bath, two bed rooms and a store-room. Each building to have a house laundry. Each flat also has its own porch. All modern improvements. Central steam heating plant. To be erected on Clarissa street, south of Wayne avenue, Wayne Junction. Harold C. Irwin, owner, is now taking bids. The same architect has plans also completed for alterations to 2110 Allegheny avenue, for Steel Heddle Manufacturing Co., for new boiler and pump rooms, coal pocket, driveway, etc. Philip Halbach, A. R. Raff and Geo. Sipps, builders, are bidding.

Clifford H. Shivers and Ballinger & Perrot, associate architects, 1200 Chestnut street, have completed drawings and specifications, and bids are due July 2d, for a public high school building to be known as the William Milligan School, to be erected on the west side of Broad street, north of Delaware avenue, Woodbury, N. J., under the authority of the Board of Education. In general dimensions the building will be 116 x 159 feet, with two stories and basement, the first floor being several feet above the ground level. The building is of the Colonial style, with a classic wood cornice, and a wood cupola with dome and weather vane of copper. In plan the building resembles the letter T, and is arranged to secure the best possible lighting of the class rooms. The exterior walls will be of rock face Ridley Park or other stone, with trimmings of Indiana limestone. The main entrance will also be of limestone and the entrance steps of granite. Black slate will be used for the covering of the main roofs. The interior of the building will be of wood construction, with two large fireproof stairways connected with all floors. In the basement will be located the manual training and laboratory rooms, the boys' and the girls' recreation rooms, and the boiler room. Eight classrooms will be on the first floor, together with the principal's and the teachers' rooms. In the second story there will be seven classrooms, a teachers' room, and an assembly room capable of seating about 350 persons. Several Philadelphia and Woodbury contractors will submit bids.

#### A COMMUNICATION.

OFFICE OF CHARLES B. KLINE,  
28 South Sixteenth Street,  
Philadelphia.

Philadelphia, June 12, 1908.

Mr. Jno. N. Gallagher,  
Publisher Real Estate Record and Guide.  
Dear Sir:

Having sold my stock in Hall-Kline Company and severed my connection with that firm, I desire to tell my friends and customers that my business is now located at No. 28 South Sixteenth street, Philadelphia, where I immediately started in business after retiring from the Market street concern. I have been informed by several persons that when they made inquiry as to my whereabouts they were told that I was dead; that I was out of business; that I had removed to West Philadelphia, or something of a misleading nature. I would be pleased to have this matter given the widest publicity, and also to state that I am very much alive and receiving encouragement from old patrons as well as those who are attracted by my up-to-date display in tiles, heaters, mantels, ranges, etc.

Yours very truly,

CHARLES B. KLINE.

## 1908

From January 1st to June 30th, inclusive

**Building Operations and Transfers of Real Estate, including mortgage and ground rent incumbrances on the real estate transferred, together with the Sales at Auction.**

3,069 New Buildings of all kinds, costing \$10,894,172, exclusive of the cost of the land, against 5,488 for the same months of 1907, which cost \$19,726,300, a falling off from the results in the same period last year of 2,419 new buildings, and a decrease in the investment of \$8,832,128.

1,191 Alterations and Additions (costing \$300 and over only included), costing \$1,786,500, a decrease of 197, while the investment is less by \$295,500.

**Total Investment in Building Improvements of all kinds, \$12,680,672, against \$21,808,300 for the same months of 1907, a falling off of \$9,127,628.**

10,387 Transfers of Real Estate to June 30th inclusive, against 13,078 for the same months of 1907, a loss of 2,691, while the value of the property transferred is less than that of last year by \$16,987,750.53.

We are prepared to declare that, after a laborious and painstaking effort to get at the very bottom of conditions as they are expressed by the fact that dwellings of all kinds in this city are fairly well occupied and that the rents are in the main promptly paid, clearly establishes the fact that there is behind our people a reserve force equal, if not superior, to that of the people of any city under the sun. Of course there are spots here and there wherein this statement is not justly true; but are not these spots co-existing with all conditions at all times in large cities?

As we have found conditions—and there is no better criterion than the rental lists in the hands of capable and experienced real estate men in various sections of the city—they are far better than anyone had a right to suppose existed before investigation.

The southern half of the city is entitled to the credit of having a smaller percentage of vacancies than that north of Market street, for the heaviest percentage of vacancies that we could find in this section was but a fraction over 3 per cent. of the rental list, while in the Italian quarter it was but 2 per cent. In a general list, embracing all kinds of dwellings, even including the residences that command \$100 per month, the vacancies amounted to but 5 per cent.; while in another list, strictly con-

finned to the small houses, well distributed, the vacancies numbered but a trifle over 2 per cent.

In the textile section of Kensington the percentage of vacancies is very much greater; but we are assured that it will not exceed 12 per cent.; but right here we make the point that tenants are unusually exacting in their demands for betterments and seem ready to abandon houses in bad repair. Indeed, in one case one gentleman informed us that his firm took the bull by the horns at the very beginning of the "tie up" and started the painters and paperhangers vigorously at work, to the great satisfaction of the tenants and the profitable advantage of the owners.

In West Philadelphia we do not believe that there are any more vacancies than usual at this time of the year; but there is a single statement which holds good everywhere, and that is to the effect that dwellings renting from eighteen to twenty-five dollars per month suffer most, and that more restlessness is noticeable among the renters of such houses. Our interpretation of this feature of the rental question is, we think, in the fact that such dwellings are preferred by those who are employed as clerks, bookkeepers and salesmen in stores, who are usually less prepared to face prevailing conditions than the poorer classes. They live closer to their means, without a proper regard for the rainy day.

When it is understood that, according to the real estate assessors' returns of taxable properties in this city last year, there were 300,656 dwellings of all kinds, it is rather a difficult matter to secure either a consensus of opinion on the actual number of vacancies in the vast quantity of buildings of this character, but we think our own opinion is considerably reinforced by certain other facts we have gleaned, for instance, the withdrawals of money from our Saving Fund institutions, which, in the present instance, go very far in corroborating our conclusions, for one of these institutions had, on May 1st last, about the same deposits as on January 1st, and the withdrawals since May 1st amount to only 2 per cent. of the deposits; while another lost 1½ per cent. by withdrawals; while still another lost only ¼ of one per cent. We find that the constable, since January 1st last, has not been in great demand in any section.

There has been considerable revival—comparatively modest, of course—in our textile interests; manufacturers are buying yarn, and are disposed to operate when it is justifiable.

At present there is considerable demand for mortgages, and additional importance has been added to their value for investment through a system of guaranteeing them on about the same principle as the title to real estate is guaranteed by the title insurance companies.

In West Philadelphia it is stated that a strong demand for dwellings is very apparent, and, while not so vigorous as heretofore, there is still enough evidence of the continued popularity of that section of the city for rental purposes.

There are 2491 two-story dwellings this year so far against 4599 for the same months of 1907, a loss of 2018. The losses by wards are mainly distributed as follows: The Sixteenth ward lost this year 19; the Twenty-second lost 137; Twenty-fifth, 122; Twenty-eighth, 12; Thirty-third, 307; Thirty-fourth, 426; Thirty-sixth, 68; Thirty-ninth, 474; Fortieth, 163; Forty-second, 248; Forty-third, 37; Forty-fifth, 236.

The gains in two-story dwellings are unimportant, except in the Twenty-third, which gained 89, and the Forty-sixth, which gained 73.

There are 381 new three-story dwellings this year, against 649 for the same period of last year, a loss of 268.

The principal losses by wards are as follows: Twenty-second ward, 140; Twenty-third, 30; Twenty-fourth, 10; Thirty-second, 47; Fortieth, 19; Forty-second, 8; Forty-third, 51.

The gains by wards are as follows: Twenty-fifth, 7; Twenty-ninth, 8; Thirty-fourth, 22; Thirty-fifth, 2; Forty-first, 9; Forty-sixth, 41; Forty-seventh, 1.

There are only two four-story dwellings, against the 43 that were built during the same months last year.

Office buildings over two stories lose 4, and the investment is \$1,460,000. There are none of those buildings to report this year. There are 8 less warehouses this year than last, and the investment suffers just \$392,350.

The swath cut in the construction of industrial buildings is a wide one, for there are only 28 of these to report this year, against 61 for the same months of 1907. The difference is 33 in number, while the investment is \$1,285,850 less; a vast difference in factories and mills, for while there were 30 of these last year, with an investment value of \$1,408,740, there are only 9 this year, representing an investment of \$191,875, a difference in the investment of \$1,216,865, which is nearly the sum total of the difference in the construction of industrial buildings.

Stores (not stores and dwellings) number 20 this year, against 36 last year, and the investment is less by \$801,830; school houses number 3, costing \$435,000, against 5 last year, costing \$250,000, a gain in the investment of \$185,000; stables are 61 this year, against 83 last year, a loss of 22, and \$51,300 less in the investment; churches number 4 this year, against 7 in the six months of 1907; but the cost of those erected this year is greater by \$59,692.

It will be seen that our table of miscellaneous buildings records 63, the same as last year, but the investment is greater by \$464,385, caused by the Hammerstein Opera House, costing \$750,000; the Athletic Ball Park, \$250,000; libraries, costing \$432,000, together with an apartment house, costing about \$200,000.

Architects are not generally hopeful of immediate improvement in their direction; some of them have considerable work in hand, while others are doing nothing. The sentiment among owners who contemplate building is to the effect that there will be a shrinkage in the cost of both labor and material. This is sufficient to hold up proposed building at any time and is particularly efficient under prevailing conditions.

Transfers of real estate number 10,387 this year, while the number covering the same months of 1907 was 13,078, a falling off of 2,691, which, of course, indicates considerable shrinkage in the demand for both investment and home properties. The value of the properties transferred this year is \$42,914,684.42, while last year the value amounted to \$60,602,434.95, a difference of \$17,687,750.53. This means a considerable loss of business distributed between our builders and brokers. The mortgage incumbrance on the properties transferred this year is \$26,393,193.50, or 60 per cent., while the ground rents amount to \$175,083.18, which, on a 6 per cent. basis, represents a further incumbrance of \$29,260.53, or a total percentage of incumbrance of 66.66 to 100 per cent.

Comparing the percentage of incumbrance with that of the properties transferred last year, we find that in 1907 the mortgage incumbrance was 53.7 per cent., or nearly 7 per cent. less than this year, while the ground rent incumbrance was 10.3 per cent. last year, or nearly 4 per cent. more than this year, while the total percentage of incumbrance last year was 64 per cent.; hence it is plain that the properties conveyed this year bear a heavier incumbrance than those transferred last year for the same months by 2.06 per cent.

We think that the selling of real estate at auction indicates business conditions as well as that peculiarly strong reserve strength among our people to which we referred in our statement of rental conditions; and, indeed, it is surprising that more of our people were not compelled, through business conditions, to appeal to the auction room to effect quick selling. The sales at auction this year show a total of \$1,477,998.01, against \$2,251,865.17, a difference in favor of 1907 of \$773,867.16. The properties sold at auction were clear, while they were burdened with \$839.03 ground rents.

There is no room for pessimism that we can recognize; for, while business and industrial con-

ditions are bad enough, there is, when compared with the first months of the year, considerable successful effort in the direction of improvement. Manufacturers were not loaded with irremovable stocks at the close of 1907, but the stores were well stocked, and we think that this was the prevailing condition all over the country, and, of course, it will be some time before consumers will be able to relieve the dealers of any surplus, even in the fall and winter stocks carried over from 1907. This can only hold good, however, in its application to the industrial end of the proposition, for the agricultural end is, according to reports, even better than last year; for nature's bounty, once turned into money or credit, represents a purchasing and consuming energy beyond the power of man to estimate. In other words, grass means hay and hay means money, and agricultural energy is the big cogwheel which starts the other wheels and keeps them going, for, when the farmer quits, there is little to expect in any direction.

There is a plethora of money among our big financial institutions, while the small banks have loaned up to their limit.

It is stated that the Republic Iron and Steel Co., which is among the great iron manufacturers of the country, has closed for repairs, and has announced that hereafter it will operate on the open shop basis.
